Our History

- **In 1985,** AlZamil Company for Industry, Trade, and Transport was established as a building materials trading company. Since then, AlZamil Company has primarily specialized in steel, cement, waterproofing, and thermal insulation. With a forward-thinking vision, the company has evolved over the years and expanded into various fields as part of a five-decade plan and a strategy to keep pace with the country's trends and meet the requirements of the local and Gulf markets.
- **In 1997,** AlZamil Company began manufacturing its own products and established its factories. As a result of these developments, AlZamil Company has become the largest leading manufacturer of water tanks in the Kingdom of Saudi Arabia.
- **In 2000,** we established our factory for manufacturing automatic doors to keep up with advancements and achieve our strategic vision. Through continuous development, we have reached the highest level of quality while ensuring our ability to keep up with the market.
- **In 2013,** AlZamil Company started manufacturing floor opening covers, engineered from specially designed components to meet the highest standards of durability and quality. Through several stages of development, we have attained the forefront position in the classification of this product.

- **In 2017,** the world's largest factory for manufacturing polyethylene tanks using blow molding technology was established. We strive strongly because we know that this new investment will contribute to enhancing our manufacturing capabilities and meeting the needs of the local and export markets.
- **In 2020,** a second factory was established for polymer production, specializing in raw materials. This new addition is a realization of our aspirations and a clear improvement in delivering our products.
- **In 2023,** AlZamil Company began manufacturing high-capacity water filters that effectively remove harmful substances. This step represents a continuation of the outlined steps for the company, which delivers its products according to a clear vision and strategy.
- **In 2024,** In 2024, we began manufacturing central water heaters as part of our strategy to expand our solutions and product offerings across multiple sectors

SAUDI MADE PRODUCTS

MADE WITH CONFIDENCE... AND ZAMIL EXPERTISE

High quality industrial solutions from the heart of Saudi Arabia

Water Solutions

We provide integrated solutions for water storage, management, and purification.

This includes **blow-molded polyethylene** water tanks, offering the highest standards of hygiene and durability, as well as advanced Aqua Tower filters that efficiently remove harmful substances and impurities.

All **our products comply with both Saudi** and international quality standards, and come with long-term warranties.

Water Tanks

Polyethylene Tanks

Polyethylene Tanks are manufactured at Al Zamil industry, Trade and Transport Company's ISO 9001:2015 certified Plant. We produce tanks with the highest quality standards to be the first tanks that got the Performance Sign that meets the Saudi Specifications SASO and British WRAS Certificate to suit various applications for water storage.

Researching and developing
since 1985

Underground Tanks

It consists of independent units with a capacity of 5,000 liters each unit. When they are assembled, they form a giant capacity exceeding **100,000 liters**.

- The unique and effective design of this type of tanks ensures that there will be no liquid leakage in the future.
- The units can be transferred to the installation site directly from the factory, and the company's specialized technical team will assemble and install them at the site.
- It is suitable for storing most types of liquids such as water or most chemical substances as requested by the client.

Water desalination and purification solutions

Filters

Aquatower Purification Filter

Works on water purification using the reverse osmosis (RO) system.

Aquatower Water Purification filter is distinguished by its ability to remove all sediments, impurities, dust, and harmful chemicals that result from connections and ground installations.

It also removes chlorine and adjusts the amount of dissolved salts in accordance with the standards of the World Health Organization, while preserving the beneficial elements needed by the body.

It is also characterized by its high ability to remove 98% of dissolved salts in water, 99% of organic materials, viruses, bacteria, and sodium.

The filter is rust-resistant as it is made of Polypropylene (PP) Food Grade material with an elegant design and excellent distribution for the stages inside the filter.

Researching and developing
since 1985

PPR pipes and connections

ZAMIL PIPES

PPR Pipes

Researching and developing
since 1985

BQ PPR pipes and Fittings are manufactured in BQ plants in Germany. This company provides a wide range of high-quality polypropylene thermal pipes and fittings that are suitable for hot and cold drinking water, and for air conditioning systems as well

● PPR Pipes:

These pipes are used to carry hot and cold water indoors and can withstand a water pressure PP-RCT Pipes

● UV Pipes

The pipes are UV insulated with ultraviolet Resistance and are

● Anti-Bacterial B-Clean Pipes

The inner layer in this type of pipes prevents the growth of bacteria

Infrastructure Solutions

We contribute to infrastructure development with specialized products such as heavy-duty manhole covers and drainage systems.

These products **are built to withstand harsh conditions** and meet the engineering standards required for major urban and utility projects.

Manhole Covers

Manhole Covers

Manhole covers are manufactured using Composite Materials (BMC) in Al Zamil plants. They are used to cover underground storage tanks, cesspits, and electrical and telecommunication rooms.

This type of covers is characterized by light weight and high tolerance in comparison to the other types of covers, such as aluminium and iron cast covers. We also provide covers with different colors and decorations to fulfil the customer requirements.

Security Solutions

We strive to provide smart and **sustainable solutions** in the field of energy and lighting.

This **includes integrated, high-efficiency** lighting systems designed to meet the needs of residential, commercial, and industrial spaces.

We also work on **developing energy-efficient lighting** technologies that support modern environmental trends.

Automatic doors

Automatic doors

Researching and developing
since 1985

Zamil Automatic Doors manufactures high-quality, safe doors under the supervision of a specialized team of engineers and technicians with extensive experience in production, installation, and maintenance.

what sets us apart

Customized Project Solutions

We excel in providing tailor-made solutions for diverse projects to meet their specific requirements.

Sustainability

We acknowledge the importance of environmental responsibility and sustainability.

Research and Development

We believe in the significance of research and development in advanced technologies and studies to improve our efficiency and increase productivity.

Specialized Engineering Team

We recognize the value of having a specialized workforce encompassing diverse expertise and skills. By emphasizing their training,
